DETAILED ACTION

1. This Office Action responds to Applicant's amendment filed on 9/11/2003. Claims 21-23 are pending, wherein claims 1-20,24-26 have been cancelled. Claims 21-23 have been examined and are allowed, wherein claim 23 is subjected to the following Examiner's amendment.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

As per **claim 23**, --,-- (coma) has been inserted after "elements" (line 7).

Priority

3. As indicated in the previous Office Action, acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/582,327 filed on June 23, 2000, which is a 371 of PCT/JP98/05688 filed on December 16, 1998.

Allowable Subject Matter

4. **Claims 21-23** are allowed.
5. The following is an examiner's statement of reasons for allowance:

As per **claims 21-23**, the previous Office Action mailed on 5/22/2003 sets forth the patentability of Applicant's claimed invention, wherein as previously indicated, the independent claim 21, which the claims depend, recites storage medium on which there is stored a cell library having logic circuit components, comprising the inventive features in which the cell library is registered with at least two kinds of cells which are different in delay and power consumption, each cell being constructed of switching elements which have different threshold voltages while having the same function and shape, as claimed. The prior arts made of record teach various circuit cells designs, including those cells stored in cell library, which have different threshold voltages for the same or equivalent function, designed for optimal power and/or delay requirements; however, none of the prior arts made of record teach or suggest that these cells also have the same shape while maintaining the same function and being constructed of switching elements which have different threshold voltages, as claimed. Accordingly, the claimed invention is novel and un-obvious over the prior arts made of record.

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
